SURCHARGE FORMULA TO BE APPLIED IN CASES WHERE SURFACE DRAINAGE IS CONNECTED TO THE DISTRICT’S SANITARY SYSTEM

APPLICABILITY

Wherever the District has discovered that a customer’s roof drain, downspout, storm sewer or similar facility conducting surface water has been connected to the District’s sewer system and such customer has failed to take appropriate action, within thirty (30) days of receipt of a demand by the District in accordance with the rules and regulations of the Public Service Commission to eliminate such connection, a surcharge will be imposed upon the customer calculated on the basis of the following formula:

\[ S = A \times R \times 0.0006233 \times C \]

- **S** = the surcharge in dollars
- **A** = the area under roof and/or the area of any other water collection surface connected to the sanitary sewer, in square feet
- **R** = the measured monthly rainfall, in inches
- **0.0006233** = a conversion factor to change inches of rain x square feet of surface water to thousands of gallons of water
- **C** = the utility’s approved rate per thousand gallons of metered water usage

The utility shall not impose the surcharge unless and until the customer has been notified by certified mail, return receipt requested, or by hand delivery, that it has been established by smoke testing, dye testing, or on-site inspection that rain or surface water is being introduced into the sanitary sewer system at the customer’s location, and that the customer has not acted within thirty (30) days from receipt of such notice to divert the water from the sanitary sewer system.

Said surcharge shall be calculated and imposed for each month that said condition continues to exist. Failure to pay the surcharge and/or correct the situation shall give rise to the possible termination of water service in accordance with the rules and regulations of the Public Service Commission of West Virginia.
